

Makes one table from all chapters

Casey Crary

2024-04-02

This file takes all the data from “data-raw-depaginate” (which will be changed to “data-raw-dehyphenate”), and appends all the txt files into one. Aspirational goal: make this output an rds file instead.

```
# only uses first page of table

# table titles are tentative - need review
table_of_tables <- tribble(
  ~pdf_pg, ~book_pg, ~title,
  15, 9, "Contents_XX",
  335, 321, "Misc_Donations_XX",
  412, 392, "Principal_Donations_XX",
  493, 465, "Religious_Statistics_Of_The_Class_Of_'69_XX",
  506, 478, "Day_Book_Expenses_XX_MaybeUnnecessary",
  649, 607, "Date_And_Cost_Of_Buildings_XX",
  655, 613, "Cash_Funds_Of_Amherst_College_XX",
  657, 615, "Library_Numbers_XX",
  668, 626, "Statistics_Related_To_Student_Count_XX",
  676, 632, "Society_Timeline_XX",
  680, 636, "College_Periodicals_XX",
  688, 644, "Alumni_Occupation_XX",
  693, 649, "Donors_AppA_XX",
  699, 655, "Bond_List_XX",
  701, 657, "Sample_Table_XX"
)

table_of_tables
